App crashes all the time on iPad as well as the balances are always off as compared to my bank balances (not considering in progress debits/deposits). Sometimes as far off as \$1,000's of dollars off which is not even remotely close nor any rationale for that error.

**Loses entries, no not rely on it!!!**

I'm constantly losing entries I KNOW I put in my phone but never make it to the desktop!!! I can't trust it, so it's crap as far as I'm concerned!!!

**Garbage**

This app is garbage, but there's no other choice. The account update function REFUSES to let me change a password to a credit card site. The app WON'T sync with Chase Bank, and only one of my desktop accounts appears on my phone.

**Horrible user experience.**

This app is clearly not written for iOS. So many of the apps functions are not properly formatted for iOS.

I have not purchased anything, I have paid for a yearly subscription My suspicion is this means I will have to renew this yearly.. As a daily Quicken 2016 Premier user, I upgraded to Quicken 2017 this week The changes aren't very significant but I chose to upgrade anyway and take a look.

It didnt work, however, after a few failed attempts, the Cloud suddenly was getting the correct data, and that meant I could use the iPhone app.. The startup on a regular PC Laptop with 8 GB of memory should not be this slow, and the need to log in each time slows things down too.. The conversion of 20 years of entries from PC to Mac did not go flawlessly The MAC platform is disappointing.. I suspect this is a mistake they will remedy (i e Charge HST) The delivery was only a download, so maybe free delivery is OK too.. Do I like the subscription model Not really, but it does seem to work OK

The Quicken cloud relies on having a Quicken login, so you will need to set up an account, if you want to use these apps.. I have had no crashes (which I had many, with Quicken 2016), however, start-up is quite slow.. So here's my Quicken 2017 review with my thoughts about the latest version OK but ANY Quicken for PC product is more powerful.. Please note there are two separate apps, the iPad version works as an iPad app (i.
